WHY WE'RE DIFFERENT

Fueled by passion for innovation and run by consultants with deep industry experience, SSI has been known by its clients for having a collaborative and responsive approach in seeking out the "right" solution that best fits our clients. Where others are focused on selling products, SSI directs its efforts on aligning IT solutions to complement corporate objectives.

Working closely with Business and IT managers within the company, SSI's approach to solutions development follows the cycle of:

|	
01	Understanding and Documenting the company's Business and IT Objectives
02	Itemizing the tools and processes being run by the company including results obtained from the use existing facilities
03	Setting Goals: Maps out where client wants to go and
04	Implement new systems or re-purpose existing technology to achieve business transformation goals
